EXPERIENCE

Oracle Cloud Infrastructure

Seattle, WA
September 2022 - Present

Region Build Automation | Principal Member of Technical Staff

- Data analysis and tools development, helping teams across Oracle Cloud Infrastructure improve their new region delivery processes.

Oracle Cloud Infrastructure

Seattle, WA
September 2018 - August 2022

Compute Bare Metal | Senior Member of Technical Staff

- Launched 34 regions over 3 years, improving new region bootstrap time from 200+ developer hours to fully automated deployment in 8 hours.
- Implemented a new system which led to a 50% improvement in host command execution times, eliminating 200+ weekly host faults, and solving a persistent issue causing 20+ weekly operational incidents.

Amazon.com, Inc.

Irvine, CA
April 2017 - August 2018

Amazon Game Studios | Software Development Engineer II

- Gameplay, UI/UX, internal tools, and backend development for *Breakaway* and *New World*, with contributions to *Amazon Lumberyard*.
- Introduced code review, technical documentation, static analysis, and continuous integration processes to a team of 30+ engineers to improve code quality, software architecture, and product stability.

Amazon.com, Inc.

Irvine, CA
July 2015 - March 2017

Amazon Game Studios | Software Development Engineer

- Built component that enables game entities in *New World* to preserve state across server restarts, allowing 400+ players to continuously maintain gameplay progression over several months.
- Added JS/HTML/CSS hot-loading to *Breakaway* UI development toolchain, improving developer cycle times from 3+ minutes to 250ms.

Amazon.com, Inc.

Seattle, WA
May 2014 - August 2014

Amazon Web Services | Software Development Engineer (Intern)

- Reduced CPU usage by 40% on *Amazon AppStream* g2.xlarge EC2 instances by integrating an H.264 hardware encoder, using the Nvidia Video Encoder (NVENC) SDK.

United States Naval Research Laboratory

Washington, DC
May 2010 - August 2013
(Summers)

Directed Energy Professional Society (DEPS) | Directed Energy Scholar, Science and Engineering Apprenticeship Program (SEAP) (2010)

- Analyzed experimental data on the breakdown of water molecules to develop an automated computer model simulating a laser-produced electrical discharge underwater.

EDUCATION

Rensselaer Polytechnic Institute | 2015 Bachelor of Science – Dual Major

- Computer Science
- Games and Simulation Arts and Sciences

EXPERTISE

Languages

C/C++
Java
Python

Skills

Distributed Systems
Game Development (UI/Tools)
Graphic Design
